

Broadband Infrastructure Program (BIP)

A Capital Projects Fund Program

Program Background

The U.S. Department of Treasury awarded \$279 million to Pennsylvania for critical capital projects. In June 2022, the Pennsylvania General Assembly appropriated this funding to the [Pennsylvania Broadband Development Authority \(PBDA\)](#), which is using the funds to establish grant programs that identify eligible projects that meet program guidelines and federal requirements.

The [CPF-Broadband Infrastructure Program \(BIP\)](#) is one of the three funding programs created by PBDA to help deploy these funds in communities across Pennsylvania.

Program Overview

The purpose of the Program is to facilitate the deployment of high-speed broadband service infrastructure in unserved and underserved areas of the Commonwealth.

Permissible projects include line extensions of existing last-mile infrastructure and large-scale regional projects, that are required to provide last mile connectivity.

More details about the program requirements can be found in the [Program Guidelines](#).

Contact and More Information
